

NSF Symposium on Supply Chain Management in Process Industries

May 6 - 7, 2004
University of Minnesota
Minneapolis, MN 55455

The Symposium is sponsored by the National Science Foundation and the Center for Supply Chain Research at the University of Minnesota. The goal of the Symposium is to bring attention to supply chain problems and research opportunities specific to the process industry, including chemical manufacturing, food processing, oil refining, steel manufacturing, and the pharmaceutical industry. Although process industries make up a large share of the manufacturing sector, they have benefited less from recent advances in supply chain research than industries with discrete manufacturing.

The Symposium features invited speakers from both universities and industry from a wide range of academic backgrounds (Operations Management, Industrial Engineering, Chemical Engineering, and Operations Research) and industry sectors.

Those interested in attending should contact one of the co-chairs. Remaining space is limited and requests will be accepted on a first come, first served basis. To register, please contact Mrs. Karon Mooney <mooney@me.umn.edu>. Additional information is available from the symposium web site at <www.ie.umn.edu/cscr/nsfmay04.htm>.

General Co-Chairs

Saif Benjaafar (saif@ie.umn.edu), University of Minnesota, USA

Diwakar Gupta (guptad@ie.umn.edu), University of Minnesota, USA

Organizing Committee

Yves Dallery (yves.dallery@lgi.ecp.fr), Ecole Centrale Paris, France

Jan Fransoo (j.c.fransoo@tm.tue.nl), Technische Universiteit Eindhoven, Netherlands

Uday Karmarkar (uday.karmarkar@anderson.ucla.edu), UCLA, USA

Nick Sahinidis (nikos@uiuc.edu), University of Illinois Urbana-Champaign, USA
